

## The main change in the RDP

Degressiveness consider all agri-environmental measures including organic agriculture

It mean that full payment only for 10 ha, 50% of payment for the next 10 ha and the rest without payment

## Organic Agriculture

1. Agricultural crops (under conversion and after conversion)
2. Vegetable cultivation ( under conversion and after conversion)
3. Herbs cultivation (under conversion and after conversion)
4. Fruit and berry crops (under conversion and after conversion)
5. Fodder crops (under conversion and after conversion)

In case 1-4 the payment valid when farmer declare the way of spending crops (processing, selling etc).  
permanent grassland was deleted

## Agri-environmental measures

- Package 1: Sustainable agriculture – 4 years of crop rotation, no more N than 150 kg/ha/year on arable land and no more than 120 N kg/ha/year on grassland
- Package 2,3: Valuable habitat and threatened bird species on NATURA 2000 and out of NATURA 2000 – only 6 option, in last time of programme 10 options
- Package 4: Preserve threatened red plant resources in agriculture (old orchards not less than 125 trees/ha)
- Package 5: Preserve threatened animal genetic resources in agriculture
- Package 6: Soil and water protection – some option will be realised on the area threatened water and soil erosion (33% of arable land)
- Package 7: Buffer zones and boundary strips
